

Mimic memory

For both of these activities, you will need the cards on the next page. Carefully cut the page out and then cut each picture out individually.

You will need

- ✓ Mimic memory cards
- ✓ Scissors
- ✓ Glue (optional)
- ✓ A4 sheet of thin card (optional)
- ✓ Stopwatch
- ✓ A friend to play with

Make the cards

1. Carefully cut out the page with the mimic memory cards.
2. Glue the page onto a sheet of A4 card (optional).
3. Cut out each card.
4. Put the cards in a pile with the pictures down, and shuffle them.

Mimic match

1. Arrange the cards in a rectangle on a table.
2. Choose who will go first.
3. On your go, choose two cards, and turn them both over. If the pictures match, keep the cards and then have another go. Otherwise, turn them face down and let your opponent have a go.

4. Once all the cards have been matched, count the number of cards you got. Whoever has the most wins!

Mimic memory

1. Shuffle the cards together, and count out a deck of 15 cards. Keep the other five secret.
2. Give the 15 cards to your friend, and give them 15 seconds to remember as many as they can.

3. When their time is up, take the cards from them.
4. Without your friend looking, take five cards from the deck, and add the five you were keeping secret. Shuffle these together to make a new deck.
5. Give your friend the new deck and ask them to point out the ones they remembered from the first deck. Were they right?

 Milk snake	 Coral snake	 Hoverfly	 Wasp
 Viceroy butterfly	 Monarch butterfly	 Sabre toothed blenny	 Cleaner wrasse
 Ant mimic jumping spider	 Ant	 Mimic poison frog	 Poison dart frog
